

# Homegrown Products

with a worldwide reach

April 26, 2023

# Who is Eco-Shell?

Created from a family-owned business established in 1960

Founded in 1995

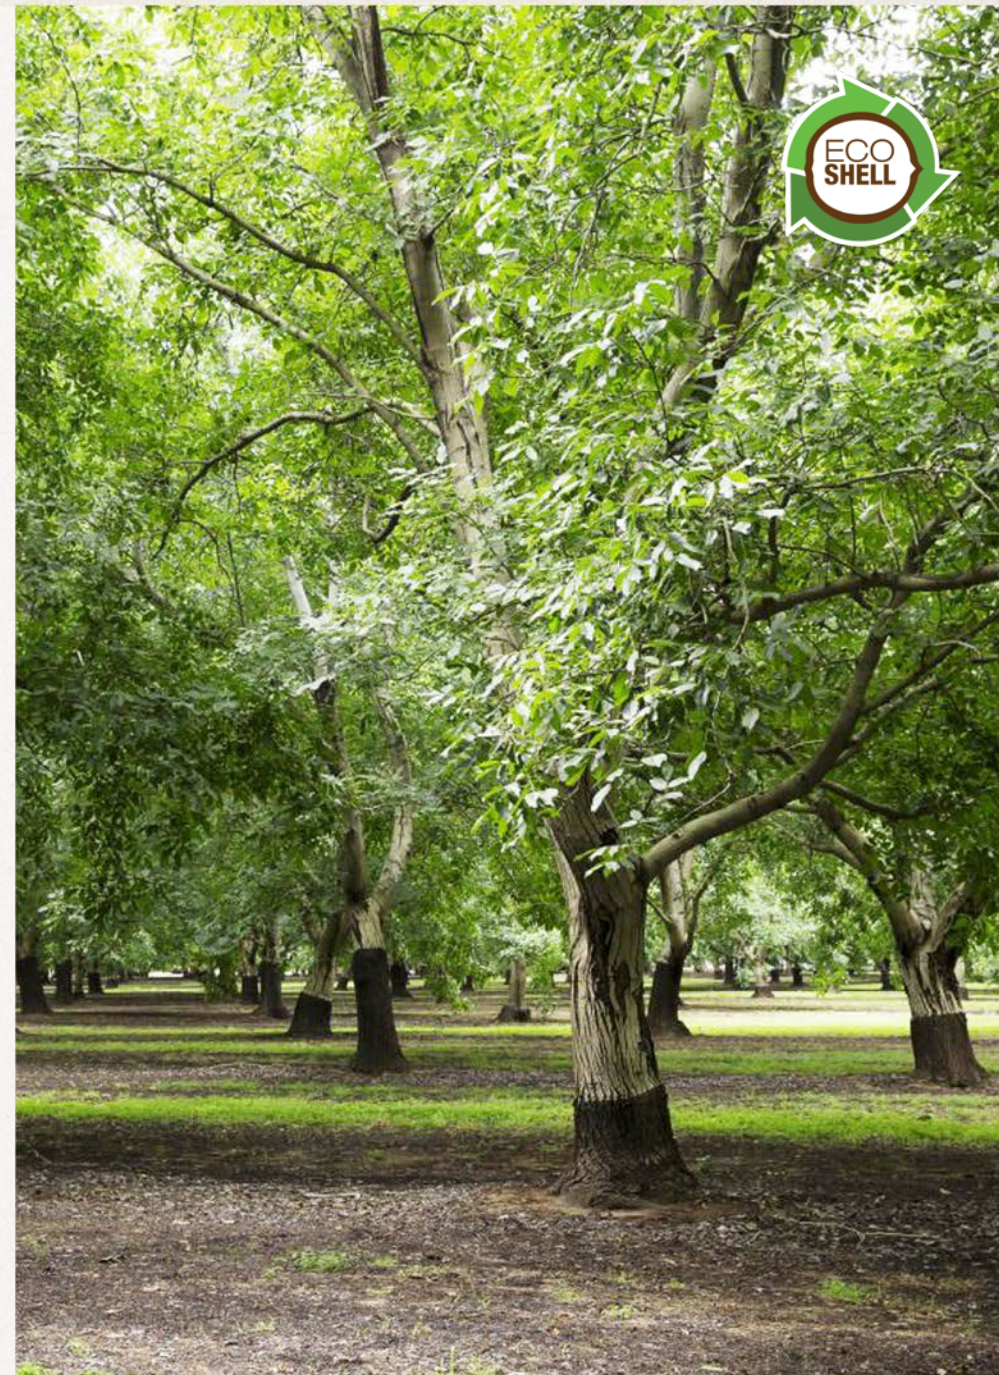

Sustainably focused

Large-scale operation: 14,000+ acres of walnut farms

In-house raw material supply:  
50,000+ tons per year and growing

# One ingredient. 1,000 Possibilities.

**Our goal:** work with a variety of industries to provide cost-effective, eco-friendly ways to utilize walnut shells

Collaborate with formulators to provide sizes that suit their needs

Provide samples for R&D

Deliver on time with global shipping and freight options

# Where our products have traveled

# The many benefits of Eco-Shell products

## **Safety**

Processed in a food-grade facility

## **Quality**

Eco-Shell meets requirements for multiple regulations

## **Versatility**

Can use the same size for many applications

## **Made in the USA**

From our family-owned farms in California

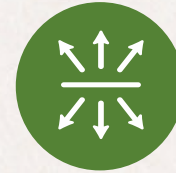

## **Readily available**

Plenty of accessible raw material

## **Cost-effective price point**

Walnut shells are a surprisingly economical option

## **Lots of room for innovation**

Consistently discovering new uses for walnut shells

# The many benefits of Eco-Shell products

**Giving new life to 50,000+ tons  
of would-be waste per year**

**Proprietary milling operation  
makes the shell gentle on the skin**

**Continuous optimization  
of energy-saving efficiency**

## **Multiple marketing capabilities**

- Sustainable
- Upcycled
- All natural
- Annually renewable
- Produced with solar power
- Pesticide-free
- Cruelty-free
